

GENERAL ORGANICS®

BioMarine® is a cold processed, enzymatically digested squid protein that boosts plant growth and provides a nutrient source for microorganisms. This squid-based fertilizer promotes better roots, stems, foliage, flowers, and fruits. A superior natural based source of plant nutrition, BioMarine suits all types of plants during all phases of growth, from seedling through harvest.

General Organics provides gardeners with a complete line of superior organic based plant foods and supplements. We combine traditional gardening techniques with the ecological and efficient materials of the future. Each product in the "GO" line enables you to enrich your garden, your life, and the planet. General Organics foundation rests upon our deep commitment to provide simple and innovative products with unsurpassed quality.

Usage:

For Light Feeding:

Add 2 teaspoons of BioMarine per gallon of water

For Heavy Feeding:

Add 4 teaspoons of BioMarine per gallon of water
