

Blu Moon Two Part Original Formula

Blu Moon Original Formula was created over 17 years ago and has been used by Master Gardeners for years to achieve prized results. Blu Moon can be used in hydroponics, soil, coco, or soilless applications. Blu Moon is made in small batches with only the purest, highest quality minerals so all gardeners can enjoy the most out of growing. Blu Moon has stood up to all major nutrient lines and will outperform any of them side by side. Blu Moon delivers the best quality, performance and value of any nutrient on the market today.

Bio Active Grow and Bloom

Blu Moon Bio Active Grow and Bloom nutrients are the premium choice for soil, soilless, or coco growing media. The bio active elements in this formula help transform the nutrients into their most available form which delivers better flavor, aroma and fruit and flower production. Each formula is made to meet all of the necessary requirements for optimum plant health and vigor.

Blu Moon Bio Active Grow and Bloom will deliver incomparably beautiful and flavorful results in your garden over and over.

Andromeda Strain

Andromeda Strain is a truly unique biological inoculant. Unlike other microbiological products on the market today, Andromeda Strain will perform well in the aqueous, high mineral environment of hydroponic systems. Andromeda Strain has been used and tested extensively in commercial greenhouse applications, and will reduce or eliminate root diseases, and greatly increase nutrient absorption. Andromeda Strain is organic based and can be used in hydroponics, soil, or soilless media.

Carbon Jolt!

Carbon Jolt! is the most unique carbohydrate synthesizer on the market today. Carbon Jolt! contains many ingredients that feed beneficial microorganisms and enhance flavor and aroma in fruits and vegetables. Carbon Jolt! will sweeten produce, reduce maturity time, chelate nutrients, improve disease resistance, and increases biological growth processes. Carbon Jolt! contains a

proprietary formula that stimulates how plants respond to the environment, allowing them to grow at their full potential.

The **NEWEST, MOST EFFECTIVE** flower stimulant on the market. Megaton is a must have for all serious gardeners! Megaton is an organically based product which will reduce internodal spacing in flowers, increase plant photosynthesis and increase chlorophyll count. Safe for use on fruits and vegetables, this product will build thicker, bushier and all around healthier plants.

Blu Moon's Armor Plant Wash is an all-purpose leaf polish, plant wash and wetting agent. Armor is a universal product that will not only improve spray coverage and create stronger, healthier foliage, but will also deter spider mites, powdery mildew and other pests and diseases without burning leaf tissue. Lab results have proven that Armor out performs other similar, organic products.

NUTRIENT FEED SCHEDULES

Recommended application rates are mL/gallon for liquid nutrients and tsp./gallon for dry nutrients

BASE NUTRIENTS

Base Two Part for Hydroponic Applications

Weeks	1	2	3	4	FLUSH	5	6	7	8	9	10	11	FLUSH		
Grow A & B*	15	20	20	30											
Bloom A & B*						30	30	30	30	30	30	30		30	

*Add equal parts of A&B, mL/Gallon

Base Two Part for Soil and Coco

Weeks	1	2	3	4	FLUSH	5	6	7	8	9	10	11	FLUSH		
Grow A & B*	10	15	20	20											
Bloom A & B*						20	20	20	20	20	20	20		20	

*Add equal parts of A&B, mL/Gallon

Bio-Active Grow and Bloom - for Soil and Coco

Weeks	1	2	3	4	FLUSH	5	6	7	8	9	10	11	FLUSH		
Grow	10	15	15	15											
Bloom						15	15	20	20	20	20	20		15	

mL/Gallon

PRIMARY NUTRIENT ADDITIVES

(Can be used with Blu Moon or any other base nutrient line)

Additives Chart (for Soil or Hydroponics)

1/4	7.5	1.5

Cal-Magic

Calcium is essential for flavor, aroma, and essential oil production. Very often calcium is not available in a usable form to plants. Cal-Magic will deliver calcium and magnesium in a readily usable microbial form which will help plants resist disease and stress, improve soil or growing media structure, increase disease resistance, and promote beneficial microorganisms. Cal-Magic will make any gardener a Master Gardener!

Mega Roots

A beautiful garden starts with the roots. Root development is essential for proper nutrient absorption. Mega Roots is an affordable root stimulant that will perform as well if not better than other root stimulants on the market. Mega Roots contains key ingredients that stimulate cell division and root formation and development.

Super 'B'

Super B is a synergistic formula that contains many beneficial ingredients such as humic acid, amino acids, seaweed extract, mineralized carbohydrate complexes, fulvic acid, and B vitamins. Super B will improve vitality, increase root mass, improve flavor and aroma of fruits and vegetables as well as enhance the bio-availability of nutrients. Super B provides the building blocks for plant growth hormones and helps strengthen plants during times of stress. Super B is formulated from the finest raw ingredients that are processed with a proprietary fermentation extraction and then blended to bring one of the finest products on the market today.

VAMpire

Beneficial microbiology is the key to a productive garden. VAMpire provides key beneficial bacteria and fungi that will chelate nutrients and increase the absorptive area of the roots. VAMpire works symbiotically with the plant and through enzymatic processes makes nutrients available to plants in the most precise form. This will help plants grow to their fullest potential. VAMpire contains a very aggressive strain of microbes that require a unique delivery system for hydroponics.

Brix Blaster

Brix is the measurement of sugar content in fruits and vegetables. Brix Blaster works with the plant's Krebs Cycle. Each living organism has a Krebs Cycle, which utilizes energy on the cellular level. Brix Blaster helps plants maximize this process thereby influencing the amount of sugar stored in the cellular tissues. Brix Blaster improves flavor, aroma, and essential oils of your favorite plants.
